1. What went well

- Revised Use-case Specifications
- Defined Software Architecture
- Created class diagrams
- Designed database
- Designed user interface

2. What went wrong

- Specifications needed more clear relationships to better distinguish user-cases, as well as more thorough descriptions for main and alternative flows within user-case model, among other small tweaks.

3. Problems and Cause

No.	Description	Cause
1	Tasks and roles needed to be assigned	A member taking a leave

4. What can be done differently next sprint

- While writing documents, allocate time to review earlier to catch mistakes or expand upon ideas

5. Lessons learned

- Despite tasks being assigned specifically to be done in small groups, an overall reflection to gather all team members' opinions and proposals is highly encouraged
