## 1. Achievements since last week:

- Developed a vision for the application and elaborated on most of the application's requirements to be worked on in the future.
- Created a rough development plan for future references during development.

## 2. Issues and impacts:

- No proper schedule for each member's specific duties and future work.
- Project scope is still broad, needs narrowing down to more specific requirements to more easily assign duties in the future.

## 3. Next week's goals:

- Create a proper schedule with concise time frames provided from each team member for future planning.
- Develop a draft build of the project if possible.
